

White House
President of the United States
Mr. Donald J. Trump
1600 Pennsylvania Avenue
Washington DC

May 30, 2017

Dear Mr. President,

I am writing to you from a village close to the area where your ancestors lived. In Germany we do suffer from the so-called "energy transition" which Mrs. Merkel, a former member of the communistic youth organization, tries to impose as a socialist planning system.

As a studied physicist Mrs. Merkel knows that there is no significant link between the burning of fossil fuels and global warming which has stopped for nearly 2 decades. For millions of people in Germany YOU are the great hope to stop this insanity. Dr. Richard Lindzen and 300 scientists have urged you leaving the Paris climate treaty. So do I.

Taxeaters hoping to benefit from US tax dollars might be very unhappy - millions of tax payers will applaud you.

Say NO to junk science. Not the climate is endangered but our freedom. Thank you for staying firm.

Kind regards from Germany,

Dr. Hans Penner
